

acbPowerMeter (Free)

acbPowerMeter charts the real-time power usage of your device. This utility is very light-weight, allowing benchmarking of your battery usage. With it you can:

- Measure how much power your cellular or WiFi radio consumes.
 - Chart the power usage of bluetooth connections, both idle and active
 - Test your favorite screen-saver
 - Tweak your backlight and see the effect on battery life
- To see power usage along with per-process CPU and memory usage, and much more, see acbTaskMan. Free Downloads:Desktop InstallerOTA Cab Installer
